

# APPLICATION

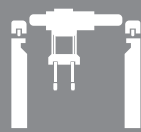

Gantry and EOT Cranes to suit every application

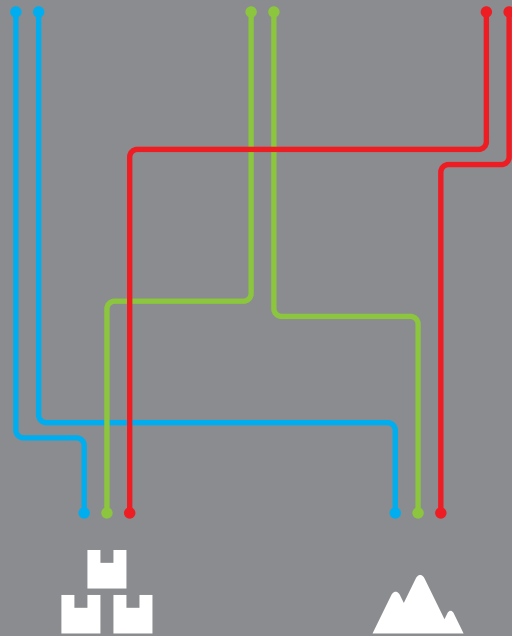

Gantry Crane

Semi Gantry Crane

EOT Crane (Process Crane)

Concrete and ferro concrete parts: for example elements with a weight over 100 tonnes or concrete binders with a length up to 50 meters

Bulk goods: for example coal, iron ore, slag or sand, gravel, cements, concretes and concrete additives (with a weight of 5 tons up to 50 tons)

We offers fully or semi gantry cranes in solid girder or lattice versions. Gantry cranes in lattice girder designs can be realised from low load-carrying capacities up to heavy-duty cranes.

# KRANBAU KOETHEN

A professional partner with international experience

Kranbau Koethen GmbH specialises in special-purpose, process and automatic cranes. The company's site in Koethen is steeped in tradition. At this location, it manufactures modern crane systems (overhead, semi-gantry or full-gantry cranes) tailored exactly to individual customer requirements. We draw on the experience we have gained over 80 years and are one of the leading European crane manufacturers. We are a market leader in quality thanks to the reliability of our crane systems. Kranbau Koethen GmbH offers an extensive portfolio of services including design, manufacturing, assembly and, above all, service. We are always on hand to help our customers. As a one-stop provider, we offer an extensive range of services for fast, competent and reliable support.

## GANTRY CRANES

The right solution for every application

**KRANBAU  
KÖTHEN**

# GANTRY CRANES

The right solution for every application

## Our portfolio includes

- Single or dual rail tubular gantry cranes
- Single- or double-girder gantry cranes
- Wide gantry cranes
- Asymmetrical gantry cranes
- Gantry cranes with single, cantilever or dual rail crabs
- Gantry cranes with multiple travelling cranes
- Heavy-duty cranes
- Fully or semi-automated gantry cranes
- Gantry cranes for handling general cargo and bulk cargo
  - Container handling
  - Storage spaces for handling scrap
  - Storage spaces for coal, sand
  - Storage spaces for pipes and/or long products
  - Lumber mills
  - Concrete factories

We also modify and repair gantry cranes, including older systems, even in cases where the original manufacturer is no longer active on the market.

## Our services at a glance

- Span and cantilever adjustments
- Increase in load-carrying capacity
- Support extensions
- Modernisation
- Renovation
- Moving cranes

When developing individual solutions and approaches, we draw on our decades of experience in building special-purpose cranes.
